

Sirocco 26

SIROCCO 26

25 YEARS OF DESIGN EXPERIENCE

The need for a 26 footer became apparent some eight years ago when we stopped producing our popular Prout Ranger 27 but our efforts were taken up in designing and producing the Quest 31, Snowgoose 37 and Quasar 50.

The Sirocco is our answer to this popular size. She is 26ft long (8 metres) and 12' 9" beam (3.88)

The sail area of 300 sq. ft. is easily handled but gives an excellent sailing performance and creates an extremely stable and safe coastal cruiser.

The boat itself is pleasing to look at and the aesthetic qualities of this cruiser are exceptional when you consider her vast accommodation.

Below decks you will be amazed at the space she offers.

There is a massive double berth forward of the saloon and three good single berths, toilet and wash cabin, in the hulls.

The saloon can seat 5 in comfort for dining. The chart table is, as usual, enormous by most standards.

The galley arrangements are handy with plenty of storage and ample work surfaces.

Water tanks are integral in the keels and contain 22 gallons (approx) each.

We feel there are few 26 footers which can match the space and head room we have achieved on this smart cruiser without spoiling the appearance.

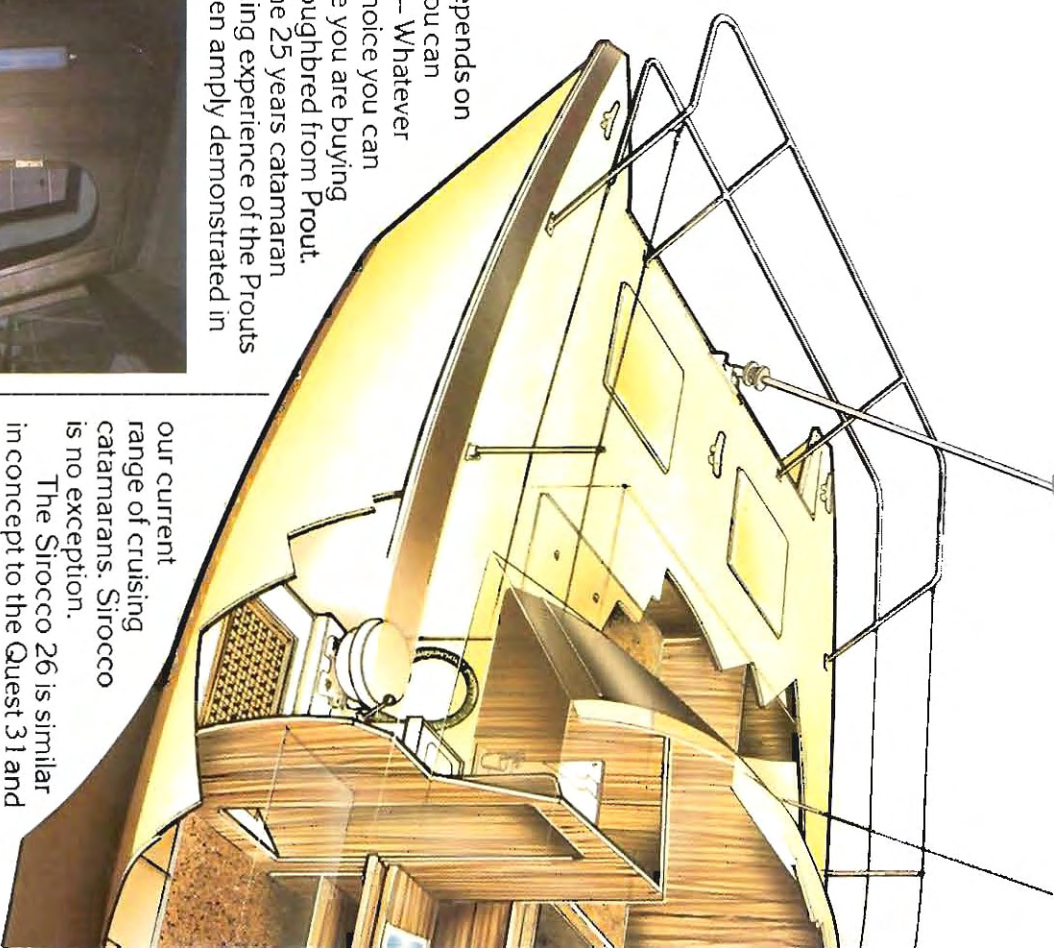

The illustrations will help to prove this but there is nothing like seeing the boat in three dimension. You will find a warm welcome at our works or from our agents if you come to see the boat; and of course to try her will confirm that she is all we claim for her.

The specification and price list describe the details of what you get for your money. The aim is to produce a boat which is top quality at a budget price.

There's a choice of engine installations, either inboard diesel with specially designed Sonic outdrive leg, or conventional outboard, mounted in the Nacelle.

It all depends on what you can afford – Whatever your choice you can be sure you are buying a thoroughbred from Prout.

The 25 years catamaran designing experience of the Prouts has been amply demonstrated in

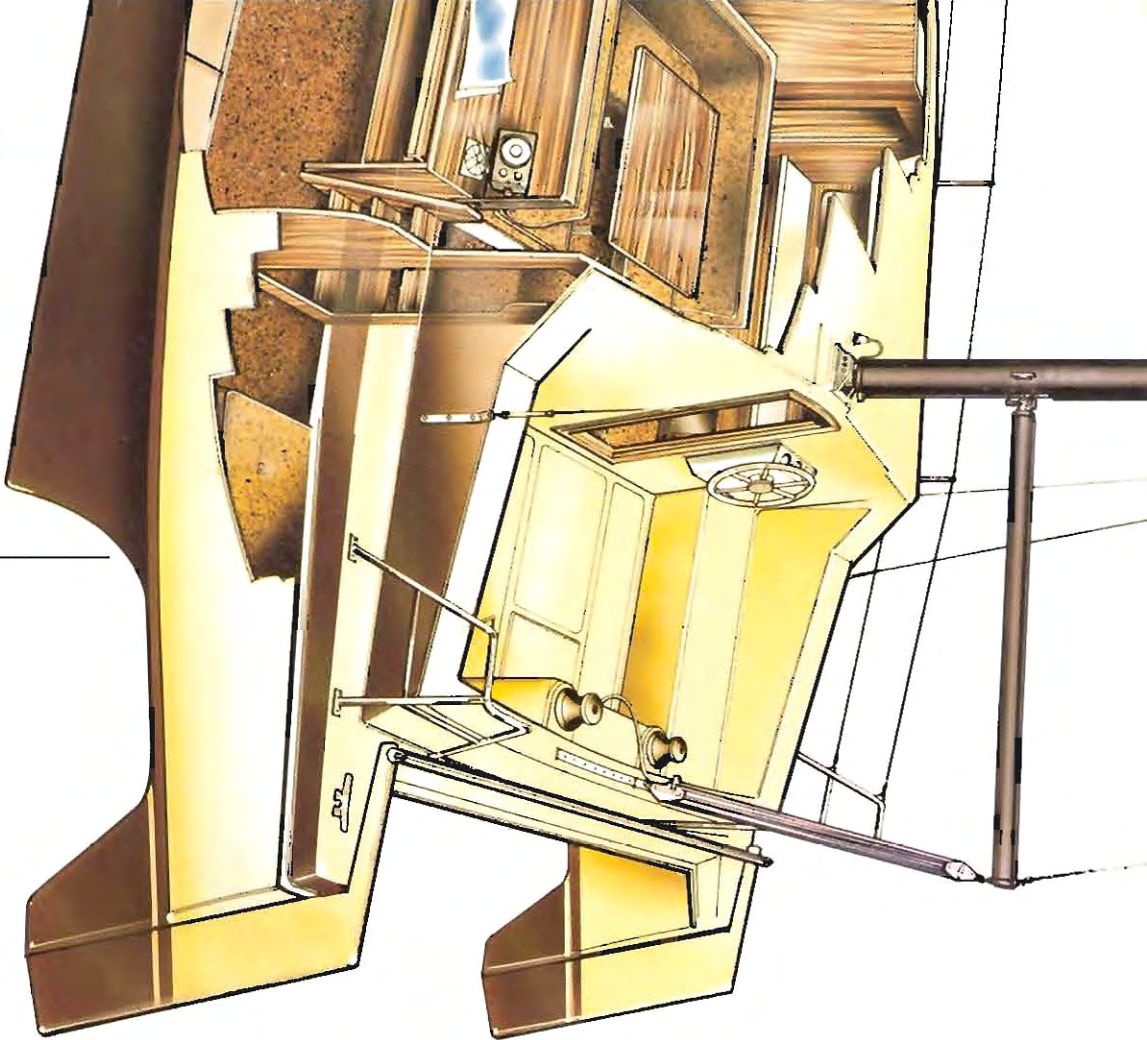

our current range of cruising catamarans. Sirocco is no exception.

The Sirocco 26 is similar in concept to the Quest 31 and many will be surprised to find she is nearly as fast. Handling qualities also are similar.

The cockpit is spacious and affords handy sheet winch position and seating.

Costing on this boat has been carefully thought out. The question was how can one keep prices down to sensible levels in this day and age.

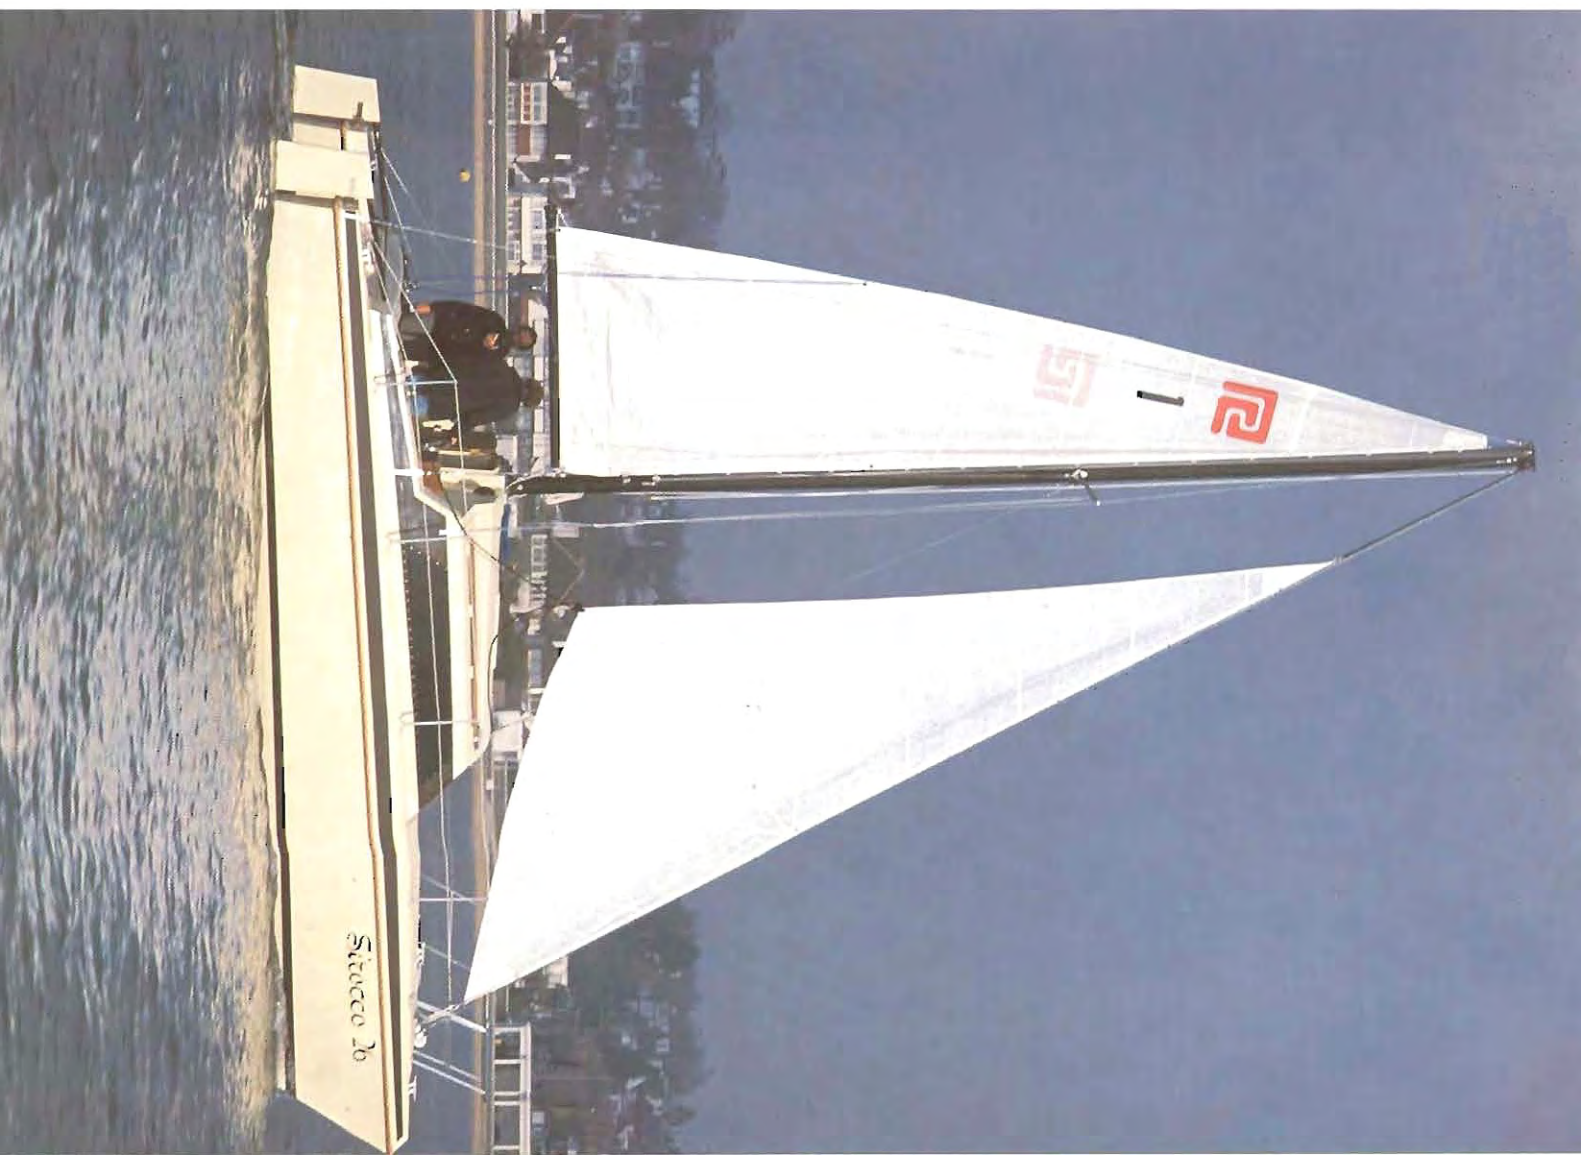

The answer, we find is to neglect nothing in the tooling up stage.

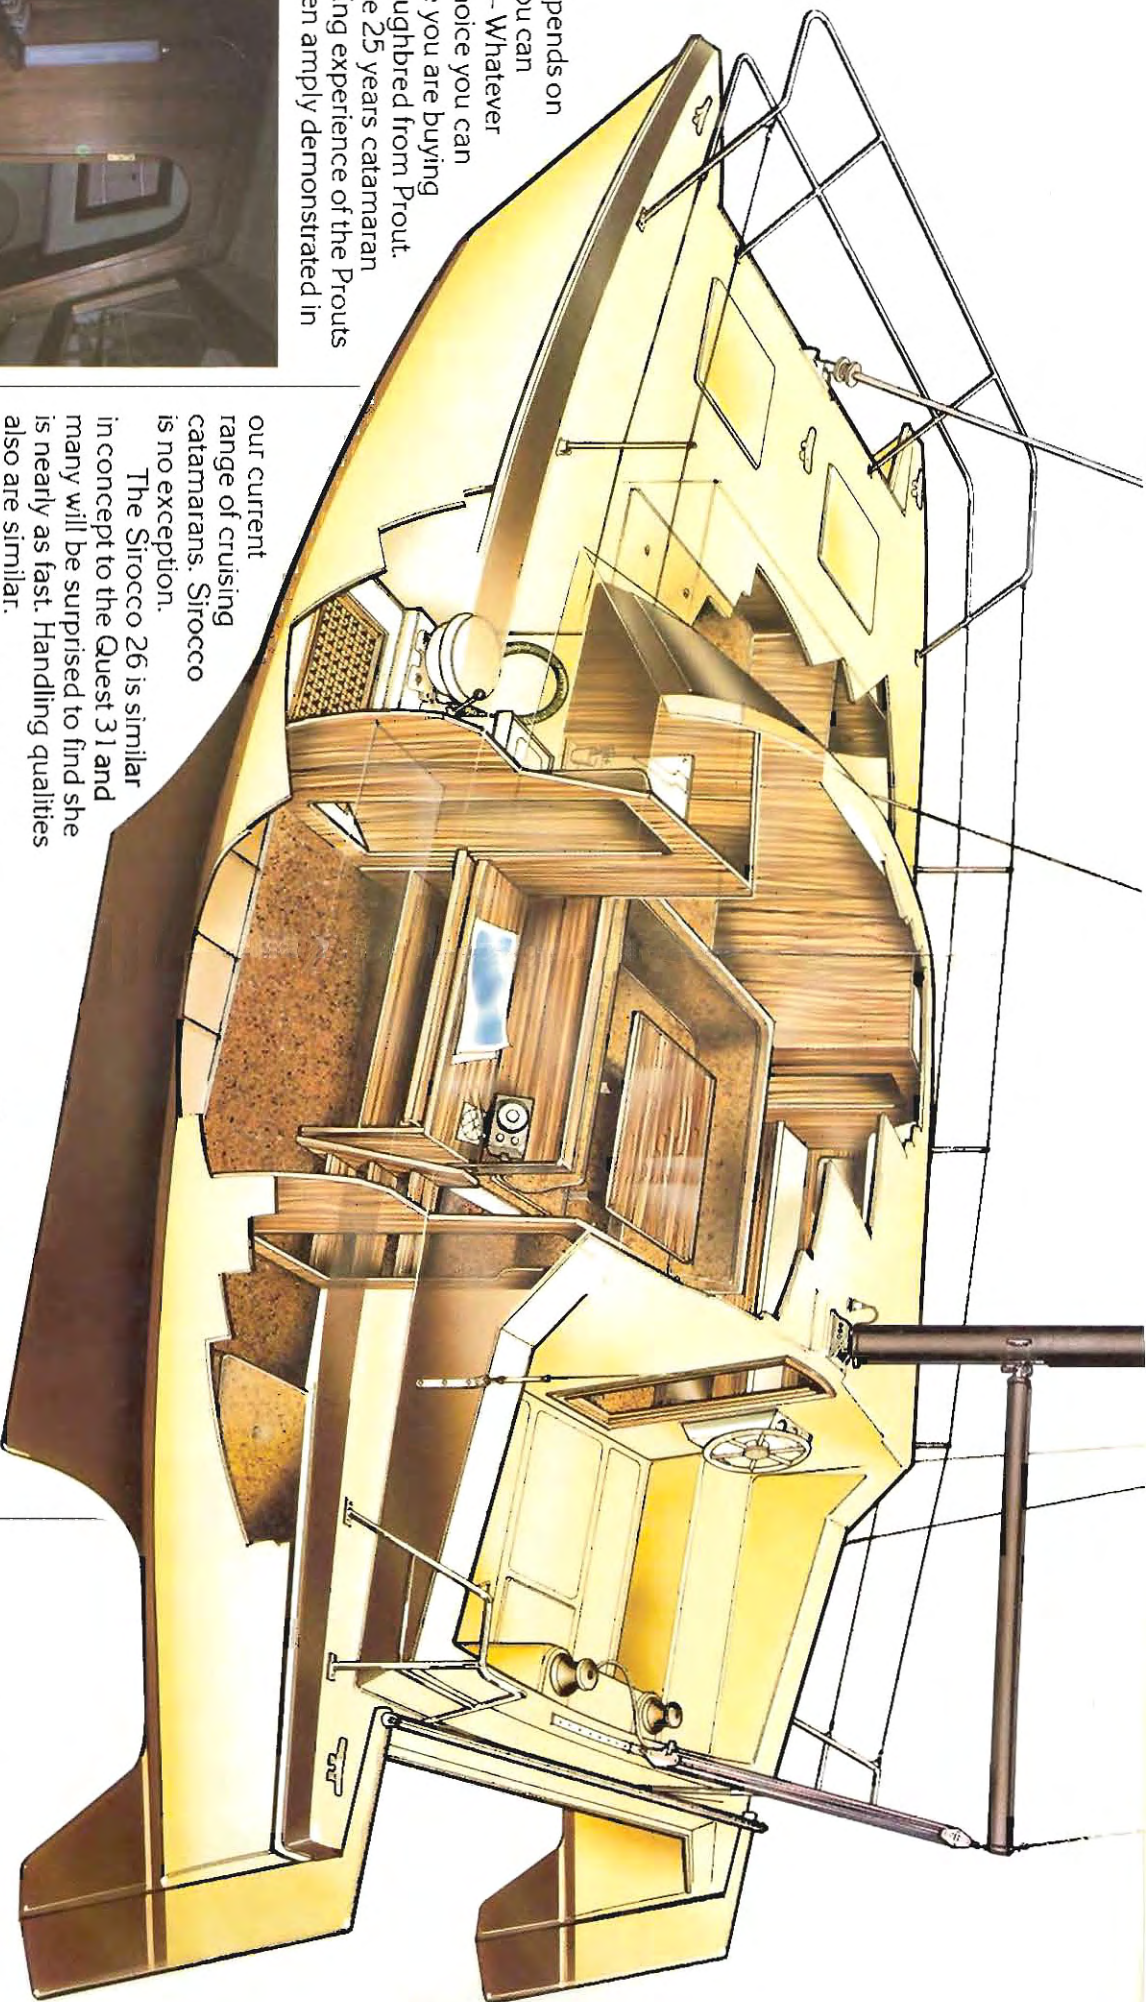

We realise it is expensive and it will take longer to amortise the costs back again but careful tooling up and making of moulds which will last and produce perfect results are an essential part of the boat business today.

Our customers can be assured that no short cuts have been made and the Sirocco is a first class manufacturing process with craftsmanship shining through all the way.
